

ChemeDox

COSHH Module
Product Data Sheet

Stop searching high and low – find all your chemical safety documents the easy way!

ChemeDox[®] COSHH Module

Effective management of your COSHH assessments allows you to save money, work more safely and, equally importantly, helps you to comply with the COSHH regulations.

The ChemeDox[®] COSHH module allows you to:

- Save time and money that you currently spend on managing your COSHH assessments
- Avoid the risk of increasing penalties and fines associated with not having the right COSHH documentation in place
- Avoid the real costs of accidents and ill health at work associated with the use of chemical substances
- Overcome any problems with accessing your COSHH assessments and other important health and safety information
- Keep on top of necessary updates and changes to ensure your assessments remain legally compliant
- Maintain an audit trail of your COSHH assessments

ChemeDox[®] COSHH module at a glance

- **Low cost, safe, secure and robust** online storage for your COSHH assessments that will be linked with your Safety Data Sheets, and other associated health and safety documentation (such as process documents, workplace risk assessments, compliance certificates etc)
- **Easy searchability** using a variety of data fields
- **Flexibility** for different levels of real-time access
- Email alerts that will help keep you up-to-date
- **Simple-to-use** reporting

Select the right service for you

- ChemeDox[®] Standard COSHH Module
- ChemeDox[®] Customised COSHH Module

Web: www.the-ncec.com/chemedox

Pick the right service for you

ChemeDox[®] Standard COSHH Module

Available as an extension to both ChemeDox[®] Silver and ChemeDox[®] Gold, our standard COSHH module allows you to:

- Attach existing COSHH assessments to the ChemeDox[®] chemical safety documentation management system
- Create new COSHH assessments. When creating new COSHH assessments users are guided through a simple-to-use, step-by-step process.

When creating new COSHH assessments:

- Access to the appropriate SDS(s) is made easy as part of the interface with ChemeDox[®]
- Summary information – for example, product name, hazard classification, risk and safety phrases – will be pre-populated in your assessments via access to associated information already held within the ChemeDox[®] system about the chemical substance(s)
- On-screen supportive guidance notes are provided so that users are aware of aspects that need to be considered when completing the assessment
- The final document is stored on the ChemeDox[®] system so that it is linked with the original SDS(s), and placed alongside any other relevant safety documentation
- Updates to the COSHH assessment can easily be made, and stored alongside previous assessment versions for audit trail purposes

With existing COSHH assessments or new assessments created using the ChemeDox[®] COSHH module it is possible to:

- Search easily for COSHH assessments using a variety of search criteria – for example, by substance or process name
- Set up your own alerts that can trigger email reminders about changes
- Generate reports about your COSHH assessment inventory

ChemeDox[®] Customised COSHH Module

Available as an extension to ChemeDox[®] Silver and ChemeDox[®] Gold, our customised COSHH module gives you all the functionality of the standard module. However, in addition NCEC will work with you to look at what additional customised functions and features can be built in to enable you to produce COSHH assessments that meet your specific organisational health and safety requirements.

To find out more about how this service, please contact NCEC – contact details shown below.

Going further to help you

As well as providing ChemeDox[®] NCEC provides a range of consultancy services. These include:

- SDS authoring
- Chemical hazard training courses
- Advice on SDS data
- Support in producing COSHH assessments
- Consultancy and training on legislation compliance

We are confident that whatever your needs we can design a service to suit, you just need to ask.
