

ChemeDox

Product Data Sheet

Stop searching high and low – find all your chemical safety documents the easy way!

ChemeDox[®]

Effective management of your chemical safety information allows you to save money, work more safely and, equally importantly, helps you to comply with appropriate legislation.

ChemeDox[®] is an online, simple-to-use, chemical safety document management system that allows you to:

- Save time and money that you are currently spending in managing SDSs and related documents (such as COSHH assessments)
- Have a powerful management system that is ready for REACH and GHS compliant SDSs
- Create your own COSHH assessments*
- Avoid the real costs of accidents and ill health at work associated with the use of chemical substances
- Overcome any problems with accessing important health and safety information
- Concentrate on other pressing Health & Safety issues
- Be at the cutting edge of Health & Safety compliance

ChemeDox[®] at a glance

- **Low cost, safe, secure and robust** online storage for your Safety Data Sheets and associated health and safety documentation (such as COSHH assessments, process documents, workplace risk assessments, compliance certificates etc)
- Ability to link associated documents to specific SDS
- **Easy searchability** using a variety of data fields
- **Flexibility** for different levels of real-time access
- Email alerts that will help keep you up-to-date
- **Simple-to-use** reporting

Pick the right service for you

ChemeDox

Our entry-level product, ChemeDox[®] provides you with a secure website from which to access your SDS information. NCEC builds the SDS database; you use the website to quickly find the information you need. It's up to you to update your own SDSs as you see fit, and to set up your own alerts that can trigger email reminders about changes.

ChemeDox SILVER

ChemeDox[®] Silver gives you the additional functionality to add other types of chemical document. So now you can add your COSHH assessments, certificates, risk assessments and link them to specific SDSs. In addition you can create COSHH assessments using the ChemeDox[®] COSHH module. We believe this really helps you get the most out of your safety documents. After NCEC have built your initial inventory of SDSs, you can update all the documents (including SDSs) yourself.

As with entry-level variant of ChemeDox[®], alerts can be created by you that will trigger an email reminder based on alert dates being met.

You can also access 'custom keys' – searchable fields that allow you to index your own documents using your own search criteria – for example, warehouse codes or site locations.

ChemeDox[®] product range comparison chart

ChemeDox GOLD

Our most complete service. You get all the functionality of ChemeDox[®] Silver with the added benefit that NCEC maintains your entire SDS library. We contact your suppliers on an ongoing basis and check that we are hosting the most up-to-date SDS. When SDSs are updated, you can choose to receive e-mail alerts, helping you keep on top of the information. This can also be used to review your COSHH risk assessments. As you are in control of your other documents these would still need to be updated by you.

Going further to help you

As well as providing ChemeDox[®] NCEC also provide a range of consultancy services. These include:

- SDS authoring
- Chemical hazard training courses
- Advice on SDS data
- Support in producing COSHH assessments
- Consultancy and training on legislation compliance

We are confident that whatever your needs we can design a service to suit, you just need to ask.
