

ChemeDox

SDS Location Module

Product Data Sheet

Stop searching high and low – find all your chemical safety documents the easy way!

ChemeDox[®] SDS Location Module

Effective management of your chemical safety documentation by location allows you to save money, work more safely and, equally importantly, helps you to comply with appropriate regulations.

The ChemeDox[®] SDS Location module allows you to:

- Save time and money in searching for safety data sheets (SDSs) and other chemical safety documentation associated with specific locations within your organisation
- Ensure that you meet your obligations under the Health and Safety at Work Act 1974, the Management of Health and Safety Regulations at Work Act 1999, the COSHH 2002 regulations, and REACH for the provision of accurate and up-to-date chemical safety information to employees and subcontractors
- Avoid the real costs of accidents and ill health at work associated with the use of chemical substances
- Maintain an audit trail of chemical safety documentation by location

ChemeDox[®] SDS Location module at a glance

- **Low cost, safe, secure and robust** online storage for your Safety Data Sheets that can be linked with other appropriate client documentation (such as COSHH assessments, training records, compliance certificates etc)
- **Easy searchability** using a variety of data fields
- **Flexibility** for different levels of real-time access
- **Simple-to-use**
 - Management of your location matrix
 - Assignment of SDSs/other documentation by location
 - Searching of SDSs/other documentation by location
- Email alerts that will help keep you up-to-date

How to find out more

To find out more about ChemeDox[®] or to arrange a demonstration:

Email: chemedox@the-ncec.com
Web: www.the-ncec.com/chemedox

ChemeDox SDS Location Module

Available as an extension to ChemeDox® Gold, our SDS Location module allows you to:

- Set up and manage a location matrix which is tailored to your business – this can include locations by organisational site right down to a specific laboratory or chemicals store
- Assign SDSs to particular locations. By default all associated additional documents (for example, COSHH assessments, training records etc) will then be captured by location.
- Search for SDSs and other chemical safety documentation by location – for example, by site, by production line etc

The uniqueness of this module is such that throughout your organisation it:

- Ensures consistency of your chemical safety information
- Avoids the risk of document duplication

Going further to help you

As well as providing ChemeDox® NCEC provides a range of consultancy services. These include:

- SDS authoring
- Chemical hazard training courses
- Advice on SDS data
- Support in producing COSHH assessments
- Consultancy and training on legislation compliance

We are confident that whatever your needs we can design a service to suit, you just need to ask.
