

REACH

The new Registration, Evaluation and Authorisation of Chemicals (REACH) Regulation came into force on 1 June 2007. Are you compliant?

As part of “The REACH Consultant Network” our skilled team can help you understand what you need to do to comply with REACH.

How can NCEC help?

NCEC can help you meet your obligations and attain best business practice. We can help you every step of the way from raising awareness with your staff to providing a fully managed compliance programme.

Key points of REACH:

- **Applies to all chemicals manufactured or imported into the EU in quantities of 1 tonne or more per year**
- Single coherent system for new and existing chemicals
- Will eventually replace up to 40 separate pieces of legislation
- Responsibility for the safe use of chemicals transfers from government to industry
- Affects manufacturers, importers and their customers
- Hazard, risk assessment, product classification and labelling information are required
- The greater the tonnage, the greater the information required
- Restricts the use of harmful chemicals

REACH Services

- Safety data sheet authoring, reviews and updates
- Classification
- Impact assessment
- Third Party Representation
- Only Representation
- SIEF Representation
- Dossier Preparation
- Exposure Scenario Development
- Chemical Safety Reports (CSR)
- Develop testing strategies
- Socio-economical analysis
